## Easy dashboard

After you log in you get access to the dashboard with easy navigation to all content. You will see a news section both from us and from your own administrator. In addition, you can get quick access to your recent projects

## Process management

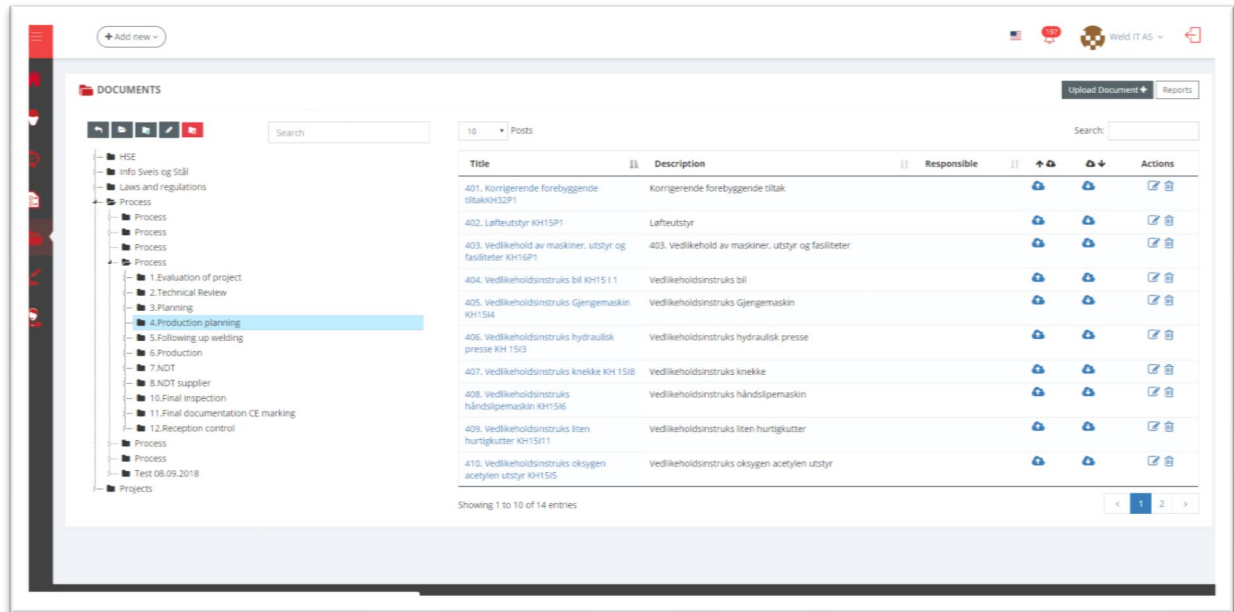

Inside the process page you will get access to the default processes, or your own processes. You can choose to create processes by folders, or you can use our integrated process management tool, Processmaker.

## Document management

We have our own document manager, where you can maintain all the content of your processes, HSE and projects. We have integrated our document management system with MS Office and their OneDrive, keeping it very easy to edit documents, without having to download anything. You can work directly in the documents online, from PC, Mac or mobile device

## Project management

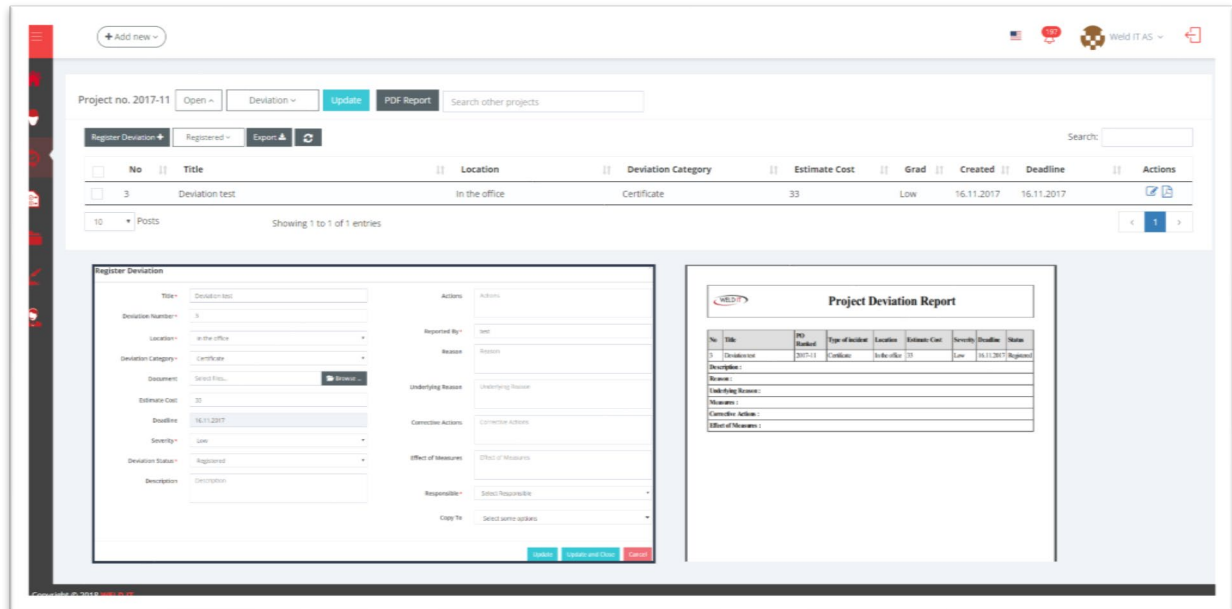

HMS2Go will help you organize your projects. Each project can be set up different and contain only those features you find necessary for each project. If you need a risk analyze, checklists or access to one or more processes, you can set it up easily. All projects can export a complete report of all that is finished during a project and at the completion of the project

## Deviation management

Deviation can relate to a project or generally. All deviations can be done in web browser or by mobile app. With mobile app you can grab a photo of the incident and make drawings and text on the deviation. Each deviation can be a part of the complete report, or you can export one by one, or merge selected ones to a PDF. The PDF will also contain any images taken.

## Checklist management

We have included one of the best checklist builder. It can be used to create your own checklist. You can do it simple or advanced. Its up to you. You can drag and drop fields exactly where you want, and even better, you can upload a PDF template and map the fields on your own. This will make your checklist also look nice
